Subject: Proposed Cease & Desist Orders for Los Osos Residents

I want to place our names on record that we object to the procedure proposed by the Regional Water Quality Control Board staff. Our objections are based on the following:

- 1) The civil authority for the area is the Los Osos Community Services District and they have assumed primary responsibility for the water quality in Los Osos. Any remedial action should be directed against them.
- 2) There is no evidence that our septic system is contributing to the nitrate concentrations in the water. Our system is over 50 feet above the water table.
- 3) Our house was built in 1977. At that time there was no other residence on our street closer than 100 feet.
- 4) The proposed action will adversely affect our ability to connect to any subsequent waste water treatment process. Any residence with a CDO will find it difficult, if not impossible, to obtain the necessary financing to pay for hook-up. This will ultimately defeat the purpose of the proposed CDO.

While we don't plan to submit any written evidence, we want to reserve the right to be included with the other Designated Parties in objecting to the proposed CDO's and have any evidence submitted to the Board applied to our case.

Respectfully,

Randall E Schuldt
